

A Professionals Guide to Decision Science and Problem Solving provides an integrated, start-to-finish framework for more effective problem solving and decision making in corporations. Drawing on vast experience in the field, the authors show how to apply state-of-the-art decision science, statistical modeling, benchmarking, and processing modeling techniques together to create a robust analytical framework for better decision making in any field, especially those that rely on advanced operations management. They integrate both newly-developed and time-tested techniques into a logical, structured approach for assessing corporate issues, developing solutions, and making decisions that drive the successful achievement of corporate objectives. Coverage includes: defining objectives, exploring the environment; scoping problems and evaluating their importance; bringing data mining and statistical analysis to bear; solving problems and measuring the results; evaluating the results and performing sensitivity analysis, and more. The book concludes with three case study chapters that walk through the effective use of its methods, step-by-step. Representing a wide variety of corporate environments, these case studies underscore and demonstrate the methods exceptional adaptability. This book will be valuable in a wide range of industries, notably finance, pharmaceutical, healthcare, economics, and manufacturing.

Key Design Factors of Enclosed Cab Dust Filtration Systems, Applications of ATILA FEM software to smart materials: 13. Modelling the behaviour of single crystal devices with ATILA: the effect of temperature and ... Series in Electronic and Optical Materials), Many Rivers to Cross: Of Good Running Water, Wild Trout, and the Remains of Wilderness, The Biggie and Other One-Act Plays Volume 1 by Albert Meglin (Paperback) - Common, Advanced Error Control Techniques for Data Storage Systems,
