

In 1973, Peter Rogers concluded that Australia has not done itself justice in the handling of modern industry versus Aborigines conflict... the lack of preparation... is a disgrace to government, private organisations and unions alike. What has happened since then? Aboriginals and the mining industry reviews three main questions - to what extent have Aboriginals shared in the fruits of the mining boom? Have new land rights helped Aboriginals protect their interests as affected by mining? And what has been the contribution of mining to the economic development of remote Aboriginal communities? These are vital questions for all concerned with the impact of mining expansion on Aboriginal communities. This book reviews the participation of Aborigines in the mining company employment. It examines the contribution of the recent land rights legislation to protecting Aboriginal interests. And it asks how far the growth of mining in remote parts of Australia has aided the economic development of Aboriginal groups living there. Detailed case studies of mining projects included.
