

Bipolar depression is now known to exist as a spectrum of disorders rather than a single disease entity. Bipolar II Disorder exists on this spectrum as a condition where the depressive episodes are as severe as in Bipolar I Disorder, but where the mood elevation states are not as extreme. This unexpected combination can lead to a failure to detect a condition thought to affect up to 6% of the population. This book reviews, for the first time, our knowledge of this debilitating disorder, covering its history, classification and neurobiology. In a unique section, fourteen internationally recognized experts debate management strategies, building to some consensus, and resulting in treatment guidelines where no such advice currently exists. It should be read by all health professionals managing mood disorders and will be informative to those wishing to learn more about the condition.

A Walk of Faith: Surviving Breast Cancer, Power Pack - Pictura Backlist, Power Crystals: Spiritual and Magical Practices, Crystal Skulls, and Alien Technology, Types and Applications of Engineering Drawings 1999: Asme Y14.24, Three Ridings on Foot: Walk Around the Yorkshire Border, Widows and Widowers Standing Strong, Water Efficiency in Buildings: Theory and Practice,
