

This book presents a collection that consists of selected papers from the International Symposium on Ecological Environment and Technology of Concrete (EETC-2005), which was held on the 6th to 8th of June, 2005, at Urumchi, XinJiang, China. The main aim of this symposium was to discuss compatibility between the ecological environment and technology of concrete, and covering a wide range of topics and scopes, including: the impact of concrete upon the ecological environment, the durability of concrete, raw materials, recycled aggregate concrete, new applications of concrete, property characterization, damaging and worsening degradation of concrete, and the behavior of concrete structures. Totally, in all, 103 papers from Japan, the Netherlands, Italy, Canada, the Taiwan area, the Hong Kong area and the mainland of China were included and presented. All contributions were subject to an excessive peer review process. The volume therefore represents an essential source of innovative ideas for those working in this apparently mundane, but nevertheless pivotal, branch of materials science.

Ecological environment and concrete technology in China. Conference Paper in Key Engineering Materials Â· January with 4 Reads. Conference.

Article (PDF Available) in Key Engineering Materials Â· January . 20 Environmental Ecology and Technology of Concrete. aWarsaw University of Technology, Faculty of Civil Engineering, Mechanics and materials (SCM) in concrete industry it is possible to considerably enhance the It should be noted however, the so prepared environment friendly green concretes, .. concrete with scm and recycled aggregate, Key Engineering Materials. This paper evaluates different concrete technologies and materials from Key Engineering Materials Environmental Ecology and Technology of Concrete . The natural environment is abominable and belongs to plateau and arctic-alpine ever-frost area. Concrete is Key Engineering Materials. Online:
