

Three themes are drawn together in this book: gender and sexuality, the organisation of work, and the impact of technological change. Their inter-relationship is explored in six area studies: manufacturing, banking, retailing, computing, nursing and housework. Gender at Work presents an account of how each area has changed since the Second World War; sets out ways in which the notion of what constitutes proper work for men and women changes with new work processes; and analyses the prospects for, and limits of, sexual equality in the workplace. Based on the first-hand observations of workers, reflecting on their work experience, this book allows workers to speak for themselves: they reveal the centrality of gender to the way capitalism is organised. A notable contribution, both to feminist and labour studies in Australia and further afield... Every woman, whether at home or in the paid workforce, should read this book.
